General	
πShaper 6_6_2.05	Model Number:
Beam Shaper	Type:
Flat Top	Style:

Physical & Mechanical Properties	
143.00	Length (mm):
<270	Weight (g):
39.00	Diameter (mm):
Optical Properties	
6.4 - 6.5	Entrance Beam Diameter, 1/e ² (mm):
2050	Design Wavelength DWL (nm):
1900 - 2160	Wavelength Range (nm):
50 mJ/cm ² @ 5ns (typical)	Damage Threshold, By Design: ☐
6.4	Output Diameter, FWHM (mm):
50 mJ/cm ² @ 5ns (typical)	Damage Threshold, Pulsed:
Threading & Mounting	
M27 x 1	Mounting Threads:
Regulatory Compliance	
Compliant	RoHS 2015:
View	Certificate of Conformance:
Compliant	Reach 250:

Product Details

- Convert Gaussian Beam Profile to Flat Top Profile
- Near 100% Efficiency
- No Internal Focusing Enables High Power Laser Input
- [AdlOptica Focal-πShaper Q Flat Top Beam Shapers](#) Also Available

AdlOptica πShaper (piShaper) Flat Top Beam Shapers are refractive field mapping optical systems that convert collimated Gaussian input beams into collimated flat top beams with a uniform intensity distribution and flat phase front. Due to the field mapping optical design, the even intensity distribution of the converted beam is stable over great distances making it ideally suitable for holography, microscopy, and system integration. With no internal focusing, they are also the perfect solution in applications such as material micromachining, welding, and engraving that require high power lasers. These AdlOptica πShaper Flat Top Beam Shapers are offered in common YAG, fiber laser, and CO2 laser sources, operating over a defined wavelength range for laser tuning. Achromatic versions are designed to be used with multiple laser sources.

Note: Focusing a flat-top beam after a πShaper results in loss of the flat top profile. [AdlOptica Focal-πShaper Q Flat Top Beam Shapers](#) are available for applications that require a focused flat top spot.
