Product Downloads

General

Type:

Flat Mirror

Physical & Mechanical Properties

Diameter (mm):

5.00 +0.0/-0.2

Thickness (mm):

2.00 ±0.20

Back Surface:
Commercial Polish

Clear Aperture (%):
90

Parallelism (arcsec):
<30

Optical Properties

Coating Type:
Metal

Coating:
Enhanced Aluminum (190-900nm)

Surface Flatness (P-V):
λ/10

Wavelength Range (nm):
190 - 900

Design Wavelength DWL (nm):
190

Substrate:
Fused Silica (Corning 7980)

Angle of Incidence (°):
0

Coating Specification:
R_{avg} ≥92% @ 190 - 250nm
R_{avg} ≥83% @ 250 - 900nm

Surface Quality:
20-10

Material Properties

Vacuum Compatibility:
10^{-7} Torr

Regulatory Compliance

RoHS 2015:
Compliant

Certificate of Conformance:
View

REACH 241:
Compliant

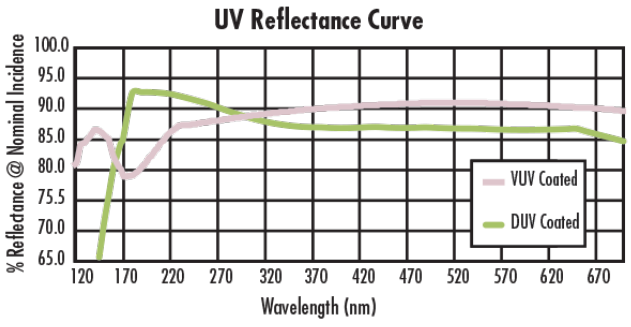
Product Details

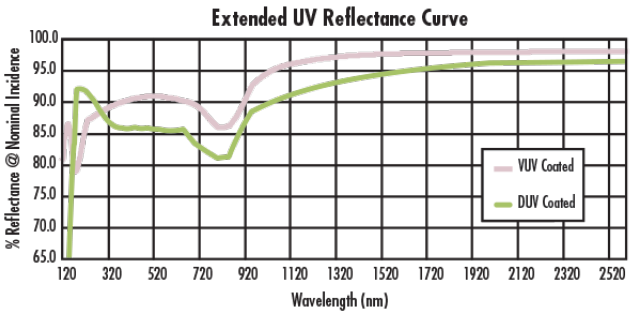
- 120nm and 190nm Design Wavelengths
- Average Reflectivity >85% Across Specified Range
- Enhanced Metallic Coatings for Broadband Reflectivity through the Visible Region

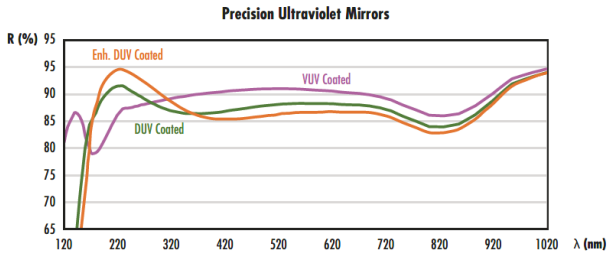
TECHSPEC® Precision Ultraviolet Mirrors are ideal for most commercially available light sources and are offered in both Deep UV (DUV) and Vacuum UV (VUV) enhanced coating options. The DUV coating offers excellent reflection from 190nm to the long-wave infrared (LWIR), while the VUV coating has optimized reflection from 120nm to the LWIR. These mirrors are designed for 0° angle of incidence and feature an aluminum-based coating for low polarization sensitivity. TECHSPEC® Precision Ultraviolet Mirrors have an average reflectivity of greater than 85% across a specified range. The mirrors are available in diameters ranging from 5 to 50mm.

Note: The soft coating can be easily damaged by fingerprints and aerosols.

Technical Information







Special Handling

These optics require special handling to avoid damage and ensure long-term performance. Proper handling, cleaning, and storage are essential to maintain optical quality. Explore our **Optics Cleaning Resources** for step-by-step guides and best practices. For personalized assistance, **Email us** or **Chat** with our technical support team.
