3.00 ±0.15

3.00 Radius R (mm):

## Optical Properties

**B270** Substrate:

Uncoated Coating:

360 - 2700 Wavelength Range (nm):

1.523 Index of Refraction (n<sub>d</sub>):

## Regulatory Compliance

**Compliant** RoHS 2015:

**Compliant** Reach 224:

**View** Certificate of Conformance:

## Product Details

- Available in Truncated and Extended Geometries
- High Transmission in the Visible and NIR
- Ideal for Cost Sensitive Applications

B270 Half-Ball Lenses feature a molded spherical surface and polished plano surface, facilitating easier mounting compared to ball lenses. The B270 substrates have high transmission from the visible to the near infrared (NIR) and have a similar refractive index to N-BK7, making these lenses an ideal alternative for cost sensitive applications. Each diameter of lens is available in two form factors, truncated (hypo-hemisphere) and extended (hyper-hemisphere), providing options to best meet system mechanical requirements. B270 Half-Ball Lenses are used in high power LED, fiber coupling, endoscopy, microscopy, and laser measurement applications.
