## Product Details

- Arrays of Conventional Cylinder Lenses
  - Used as High-Efficiency Diffusers
  - Cylindrical Axis of Lenslet is Aligned Along the First Dimension
- Lenticular Arrays consist of an array of conventional cylindrical lenses which efficiently divide, focus, and diffuse light rays. The focal length of each cylindrical lenslet is typically 3 to 5 times its width and its axis is aligned along the first dimension specified under array dimensions. Lenticular Arrays are ideal for use as high-efficiency diffusers within short working distances, projection screens and stereoscopic (3D) photography.
