General

Size (oz): 4

Norland Number: NEA 121

Shelf Life: 4 months

Type: Bottle w/ Dispensing Cap

Typical Applications: Ideal for tacking, filling, sealing, conformal coating, and tamper proofing electronic components

Optical Properties

Absorption Range (nm): 320 - 380

Material Properties

Glass Bonding: Excellent

Metal Bonding: Excellent

Plastic Bonding: Fair

Viscosity (cps): 300

Environmental & Durability Factors

Operating Temperature (°C): -150 to +150 (after cured)

Regulatory Compliance

RoHS 2015: [Compliant](#)

Certificate of Conformance: [View](#)

Reach 253: [Compliant](#)

Product Details

- Single Component UV Curing Adhesives
- Excellent Adhesion to Glass, Metals, and Plastics
- Ideal for Potting, Sealing, and Fastening

Norland Electronic Adhesives are single component UV curing adhesives designed for electronic assembly applications and have excellent adhesion to substrates exposed to UV light. Norland Electronic Adhesives are designed for fast, precision bonding in quickly cure areas that cannot be sealed, wire tacking, or fastening.

Note: NEA 121 and 123 may cause skin irritation and should be used with care when applying these adhesives. The curing process is highly exothermic – bulk material should never be exposed to high heat or ultraviolet light.
